

Acknowledgements

The collection of information for the Oneida Lake State of the Lake and Watershed Report (SOLWR) is the result of substantial teamwork on the part of many watershed partners. Agencies, organizations, elected officials, and watershed stakeholders contributed time, expertise, and resources to this report and their assistance is greatly appreciated.

The SOLWR is a component of the Oneida Lake Watershed Management Planning and Implementation Project, a six-county initiative coordinated by the Central New York Regional Planning and Development Board (CNY RPDB). The project is jointly funded by the NYS Department of Environmental Conservation using dollars from the Environmental Protection Fund, and by the U.S. Environmental Protection Agency with funds secured by Congressmen Walsh and Boehlert. Our special thanks go to these agencies for their support.

Several people at the Central New York Regional Planning and Development Board (CNY RPDB) have invested time in this publication. Stephanie Harrington took the lead in data compilation and served as primary liaison with many of the contributing organizations. Anne Saltman, Pam O'Malley, and Kathy Bertuch provided design, research, writing, and editing expertise. Bruce Keplinger and Wayne Westervelt were responsible for the website development. None of this work would be possible without the leadership and support of CNY RPDB's Executive Director, Gary Hayes.

Jessica Breiten of the Herkimer-Oneida Counties Comprehensive Planning Program participated in the overall design, research, and writing, and worked closely with Eric Newman and Jeff Quackenbush on data collection and GIS mapping. Special thanks also goes to the members of the Oneida Lake Task Force Executive and Land Use Committees for their loyalty and hard work over the past several years, and to the municipalities and the Watershed Advisory Council for their confidence as we forge ahead with the management planning process.

The following agencies and organizations have contributed staff time, information, facilities, and other resources:

Central New York Regional Planning and Development Board
Cornell Cooperative Extension of Onondaga County
Cornell University
Cornell University Biological Field Station
County Health Departments: Madison, Oneida, Onondaga and Oswego Counties
County Planning Departments: Lewis, Madison, Oneida, Onondaga and Oswego Counties
County Tourism/Visitors Bureaus: Lewis, Madison, Oneida, Onondaga and Oswego Counties
Genesee/Finger Lakes Regional Planning Council
Hamilton College
Herkimer-Oneida Counties Comprehensive Planning Program
Municipal Officials within the Oneida Lake watershed
NYS Canal Corporation
NYS Department of Environmental Conservation Regions 6 & 7
NYS Department of Environmental Conservation Division of Water

NYS Department of Health – Watertown District
NYS Office of Real Property Services
NYS Soil and Water Conservation Committee
Oneida Indian Nation
Oneida Lake Association, Inc.
Oneida Lake Watershed Advisory Council
Oneida Lake Watershed Agricultural Advisory Committee
